CLINICAL FOCUS

Obesity surgery is a central part of Dr. Arıkan's practice and is carried out within the Bariatric & Metabolic Surgery unit. Whether an operation is appropriate is assessed individually, taking into account the patient's overall health and medical history, and the available surgical options, together with their possible risks and the expected recovery period, are discussed...

He also treats diseases of the pancreas, liver diseases and biliary tract diseases, and performs oncological surgery, including surgery for liver cancer. His colorectal surgery practice includes the management of rectal prolapse and juvenile rectal polyps. In breast surgery, he performs mastectomy and breast reconstruction, and he also repairs inguinal hernias.
