DEPARTMENT

Physical Medicine & Rehabilitation

CLINICAL FOCUS

Türkü Düzel's clinical work covers physical medicine and rehabilitation, physiotherapy and the treatment of pelvic pain. Pelvic pain can affect daily activities, comfort and quality of life, and its management usually begins with a detailed assessment of the patient's symptoms, history and functional limitations.

Within the wider Physical Medicine & Rehabilitation unit, she supports patients through their treatment plan with clear guidance on exercises and therapy sessions, helping them work steadily toward improved comfort, mobility and function. Progress is reviewed as treatment continues, and the program is adapted in coordination with the treating physicians according to how the patient responds.
