CLINICAL FOCUS

Dr. Aydınli's areas of expertise center on the surgical management of spinal deformity and spinal and pelvic tumors. In deformity surgery, his listed procedures include spinal osteotomy, posterior vertebral column resection and posterior apical short-segment correction for adolescent idiopathic scoliosis.

A second focus is oncologic surgery of the spine and pelvis, including the treatment of malignant sacrum tumors, type-1 hemipelvectomy and iliosacral fixation. His published work, dated between 2012 and 2023, addresses these same areas: biomechanical and experimental studies of titanium mesh cage placement and interbody fusion, surgical...
