Acibadem Altunizade Hospital, İstanbul

DEPARTMENT
Neurology

CLINICAL FOCUS

Dr. Işık's clinical work centers on neurological conditions of infancy and childhood. A major part of his practice concerns childhood epilepsy, including West syndrome and febrile seizures.

He also evaluates and follows children with cerebral palsy, spasticity, developmental delay, balance disorders, headaches and stroke. In addition, he provides neurological follow-up for high-risk newborns and premature babies, monitoring their neurological development over time.

West syndrome Cerebral palsy

Neurological follow-up for high-risk newborns and premature babies

Stroke Febrile seizures

CONDITIONS TREATED

West syndrome Cerebral palsy

Neurological follow-up for high-risk newborns and premature babies

Stroke Febrile seizures
