CLINICAL FOCUS

Dr. Kaya evaluates and treats a range of cardiac and vascular conditions. In cardiac surgery, his areas of expertise include aortic aneurysm, aortic valve stenosis, other heart valve diseases and heart muscle diseases. Treatment planning follows the diagnosis, the imaging findings and the patient's general condition;

In vascular surgery, he treats peripheral vascular occlusions and varicose veins. Depending on the location and extent of the disease, vascular conditions may be managed with open surgical techniques or, in suitable cases, with endovascular surgery.
