Neurosurgery

CLINICAL FOCUS

A large part of Dr. Oğul's practice concerns tumors of the central nervous system. He evaluates and treats brain tumors in adults and also provides brain tumor treatment in children. He manages spinal and spinal cord tumors, and he treats pituitary disorders, which form his subspecialty area. His work with hydrocephalus addresses the abnormal accumulation of cerebrospinal fluid in the brain. Dr.

Spinal conditions make up the other major component of his practice. Dr. Oğul evaluates patients with low-back pain and with neck and back pain, including symptoms related to disc herniation. He treats lumbar spinal stenosis and cervical spinal stenosis, conditions in which narrowing of the spinal canal can place pressure on the spinal cord or nerve roots.

INTERNATIONAL PATIENTS

Dr. Oğul consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
