Acibadem Altunizade
Hospital, İstanbul

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

The core of Dr. Khenchbish's practice is the shoulder and the elbow. He evaluates and treats conditions of these joints, including injuries and degenerative changes, and performs elbow surgery and shoulder surgery when a surgical approach is considered appropriate.

Beyond the upper extremity, his work includes the management of trauma, such as fractures and other acute musculoskeletal injuries, as well as sports injuries and knee injuries. He treats muscle tears and provides care for patients with osteoarthritis, in which joint cartilage wears down over time and causes pain and stiffness.

Trauma

Pediatric Hand and Upper-Extremity Surgery

Muscle Tear Treatment

Shoulder and Elbow Surgery

Osteoarthritis

INTERNATIONAL PATIENTS

Dr. Khenchbish speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges the appointments and...
