CLINICAL FOCUS

A central part of Dr. Tirmik's work is the care of patients with musculoskeletal trauma and orthopedic injuries. This includes evaluating the extent of an injury, reviewing imaging and clinical findings, and determining whether surgical treatment or a non-surgical approach is more appropriate for the individual patient.

Treatment planning takes into account the patient's symptoms, general health, activity level and expectations. Where orthopedic surgery is considered, Dr. Tirmik discusses the goals of the procedure, the recovery period and the alternatives. Where non-surgical orthopedic treatment is suitable, care may focus on conservative measures and follow-up, with the option of reassessing if symptoms change.

INTERNATIONAL PATIENTS

Dr. Tirmik consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
