CLINICAL FOCUS

A significant part of Dr. Özateş's practice is the assessment and management of adult eye diseases. This includes cataract evaluation and the discussion of lens-related treatment options, including premium intraocular lenses, where these are considered appropriate for the individual patient.

Dr. Özateş also provides care for pediatric eye diseases. Childhood conditions seen in his practice include amblyopia, strabismus and refractive errors, which are assessed with attention to the child's age and developmental stage.

Across adult and pediatric care, the approach is to examine the patient, review any existing findings and previous treatments, and then discuss the options so that care can be planned according to...

INTERNATIONAL PATIENTS

Dr. Özateş consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as previous eye examination reports, optical measurements, retinal imaging, laboratory results, operative notes and discharge summaries, and arranges...
