Surgery

CLINICAL FOCUS

A substantial part of Dr. Özben's work concerns the colon, rectum and anus. He evaluates and treats patients with ulcerative colitis, Crohn's disease and other forms of inflammatory bowel disease who may require surgical assessment, and he performs colorectal surgery.

He also operates on abdominal wall hernias, including inguinal and umbilical hernia, and performs gastric bypass within the Bariatric & Metabolic Surgery unit. His oncological surgical work includes liver cancer and cancer of the small intestine.
