CLINICAL FOCUS

Dr. Guliyev's clinical work is the neurosurgical care of children. Pediatric neurosurgery concerns conditions of the brain, spine and nervous system in childhood that may require surgical assessment or treatment. Because children are still growing and developing, their evaluation and care differ in a number of respects from that of adult patients, and decisions about whether and when an operation is appropriate are made on an...

Families who seek his opinion can expect a step-by-step assessment. This usually begins with the child's medical history and current symptoms, a review of any existing imaging and previous treatments, and a clinical examination. On this basis, Dr.

Pediatric neurosurgery

INTERNATIONAL PATIENTS

Dr. Guliyev speaks Turkish and English, so families arriving from abroad can communicate with him in either language, and interpreters can be arranged for other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and...
