Reanimation

CLINICAL FOCUS

Dr. Kuşçu's practice covers three related areas of anesthesiology and reanimation. In intensive care treatment, she is involved in the monitoring and management of critically ill patients whose condition requires close observation and organ support. Advanced life support refers to the structured emergency measures used when a patient's breathing or circulation fails and immediate intervention is needed.

Because these areas overlap, patients and relatives may encounter Dr. Kuşçu in different settings: in the operating room as part of the anesthesia team, in the intensive care unit during a critical illness, or as part of a supportive treatment plan.

INTERNATIONAL PATIENTS

Dr. Kuşçu speaks Turkish and English, and interpreters can be arranged for patients who prefer another language. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the...
