Orthopedic Surgery & Traumatology

FOCUS

Orthopedic Oncology · Foot and Ankle Surgery

HOSPITAL

Acibadem Adana Hospital

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

A substantial part of Dr. Sarpel's work concerns degenerative joint disease. He assesses and treats osteoarthritis and other joint diseases, and performs knee replacement surgery and hip replacement surgery when conservative measures are no longer sufficient. Robotic surgery is among his areas of expertise and may be considered in selected joint replacement cases.

Dr. Sarpel's practice further includes orthopedic oncology, foot and ankle surgery, and pediatric orthopedics. In trauma care he performs minimally invasive trauma surgery for suitable fractures and injuries. Treatment planning across these areas is based on clinical examination, imaging findings, and a discussion of realistic goals with the patient, and care is planned individually rather than according to a fixed protocol.

Orthopedic oncology

Knee replacement surgery

Hip replacement surgery

Foot and ankle surgery

Anterior cruciate ligament tears

INTERNATIONAL PATIENTS

Dr. Sarpel consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, arranges appointments, and organizes the hospital stay.
