DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

In general gynecology, Dr. Özen evaluates and treats menstrual irregularities, ectopic pregnancy and HPV-related concerns. She provides endometriosis treatment, and, where surgery is considered appropriate after assessment, performs hysterectomy. Her obstetric work includes pregnancy follow-up and delivery care, including epidural, cesarean and water birth applications. She also performs genital aesthetic procedures.

A further part of her practice concerns menopause, urogynecology and sexual health. She follows women through the menopausal transition and manages related symptoms. In urogynecology she assesses and treats pelvic organ prolapse and other pelvic floor conditions. She also offers sexual dysfunction treatment, including care for vaginismus.

INTERNATIONAL PATIENTS

Dr. Özen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
