CLINICAL FOCUS

Dr. Kural's work spans medical and cosmetic dermatology. On the medical side, she assesses and treats active acne, atopic dermatitis, Behçet's disease, skin infections and warts. She also evaluates skin lesions, including the assessment of skin cancer and mole removal where clinically appropriate.

In cosmetic dermatology, Dr. Kural offers botulinum toxin treatment and anti-aging dermatology. Each treatment plan is based on a clinical examination of the skin and a discussion of the patient's individual concerns, expectations and medical history, so that the options considered are suited to the condition being treated.
