## CLINICAL FOCUS

A substantial part of Dr. Başbuğ's practice is devoted to sleep disorders, in particular sleep apnea. She evaluates patients with suspected sleep-related breathing problems and uses polysomnography (overnight sleep testing) to support diagnosis and to guide treatment decisions.

Her general pulmonology practice covers asthma, chronic obstructive pulmonary disease (COPD), and other lung diseases, as well as lower respiratory tract infections such as pneumonia. She also assesses patients with lung cancer and other thoracic cancers and performs bronchoscopy as part of diagnostic work-up.
