CLINICAL FOCUS

Dr. Ertürk assesses and manages a range of conditions affecting the front and back of the eye. Her areas of expertise include astigmatism, a refractive condition in which the shape of the cornea or lens leads to blurred or distorted vision, and blepharitis, an inflammatory condition of the eyelid margins.

She also cares for children with eye conditions. Paediatric eye diseases and amblyopia, sometimes referred to as lazy eye, form part of her practice, and assessment in younger patients is adapted to the child's age and ability to cooperate with testing. In addition, Dr.

Retinal detachment

INTERNATIONAL PATIENTS

Dr. Ertürk consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as previous eye examination reports, imaging studies, laboratory results, operative notes and discharge...
