Acibadem Maslak Hospital, İstanbul

DEPARTMENT
Pediatrics

CLINICAL FOCUS

A large part of Dr. Özbay's practice is preventive. She provides newborn follow-up and well-child follow-up, monitoring growth and development across infancy, childhood and adolescence, and addressing questions that families commonly raise in the first months of life, such as infant colic and lactose intolerance in infants.

Her second area of focus is the diagnosis and treatment of childhood infectious diseases. This includes acute conditions such as croup, as well as recurrent fever patterns that may point to PFAPA syndrome, where careful history taking over time is important to reach a diagnosis.

PFAPA syndrome

Lactose intolerance in infants

Iron deficiency and anemia in children

Infant colic

Child and adolescent health

CONDITIONS TREATED

PFAPA syndrome

Iron deficiency and anemia in children

Infant colic

Child and adolescent health

Croup
