Pathology Department

CLINICAL FOCUS

Dr. Sağlıcan's work covers general pathology, tissue examination, cell examination and cytology. In practice, this means the microscopic evaluation of tissue samples and cell preparations obtained through biopsies, surgical procedures or fluid sampling, with the aim of providing a diagnosis or supporting the assessment of a disease...

Her published work reflects experience in diagnostic pathology across several organ systems. Publications co-authored by Dr. Sağlıcan include reports on a giant leiomyoma of the appendix, a solid and papillary epithelial neoplasm of the pancreas, the association of dendritic cell infiltration with prognostic parameters in gastric...
