CLINICAL FOCUS

Dr. Okuturlar evaluates and manages a broad range of digestive system disorders, including reflux, gastritis and dyspepsia, as well as diseases of the liver, pancreas and biliary tract. She also sees patients with anemia, diabetes insipidus, obesity and upper respiratory tract diseases.

A further part of her practice is directed at older adults and at patients living with long-term conditions. This includes geriatric health assessment, chronic disease management and palliative care, where the aim is to relieve symptoms and support day-to-day well-being.
