DEPARTMENT
General Surgery

CLINICAL FOCUS

A substantial part of Dr. Büyükcuncu's clinical work concerns diseases of the digestive system and their surgical treatment. His areas of expertise include digestive system surgery, diseases of the liver, pancreas and bile ducts, small intestine cancer, and cholecystitis, an inflammation of the gallbladder. He also performs endoscopy, which may be used in the evaluation of digestive complaints.

The second area of his practice is the treatment of hemorrhoids and other anorectal diseases. Patients with hemorrhoids, anal fissures and related anorectal complaints may be assessed by Dr. Büyükcuncu, who discusses the available options with each patient after a clinical evaluation.

Thyroid surgery

Umbilical hernia

Inguinal hernia

Liver, pancreas and bile duct diseases

Digestive system surgery

INTERNATIONAL PATIENTS

Dr. Büyükcuncu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, endoscopy findings where available, operative notes and discharge...
