CLINICAL FOCUS

Anesthesiology and reanimation covers the care of patients before, during and after surgery, as well as the support of patients whose vital functions require close monitoring. Within this field, Dr. Çelik's work includes palliative care, which aims to relieve pain and other distressing symptoms and to support comfort and quality of life for patients living with serious or advanced illness.

His second area of focus is advanced life support, which refers to the structured management of patients whose breathing or circulation is failing or at risk of failing. This may include securing the airway, supporting ventilation, maintaining circulation and administering medication in a coordinated way, together with the wider clinical team. As an anesthesiologist, Dr.
