CLINICAL FOCUS

The core of Dr. Öztürk's work is the emergency assessment and treatment of trauma. This includes the structured evaluation of injured patients, the identification of injuries that need urgent attention and the interventions that follow. Burn treatment is a further area of his practice, from the first assessment of the extent and depth of a burn to the initial wound care and the decisions about what further treatment may be...

Environmental emergencies form another part of his caseload. These include drowning, acute hypoxia and airway obstruction, situations in which securing the airway and restoring oxygen delivery are the first steps. He also treats bee stings and tick bites, which range from mild local reactions to conditions that require urgent treatment.

INTERNATIONAL PATIENTS

Dr. Öztürk consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For patients who travel to Adana, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges...
