CLINICAL FOCUS

Dr. Sadıkoğlu's areas of expertise cover both diagnostic and interventional radiology. On the diagnostic side, she works with magnetic resonance imaging, computed tomography, ultrasonographic imaging, scintigraphy and virtual angiography, which are used to identify and characterize disease and to help plan treatment.

Her published work reflects this interventional focus. Topics include the percutaneous treatment of hydatid liver cysts and hydatid cysts in unusual locations, percutaneous drainage of abdominal abscesses and pancreatic pseudocysts, percutaneous treatment of malignant biliary obstruction with metallic stents, balloon dilation of the...
