Coronary angiography

HOSPITAL
Acibadem Bursa Hospital

DEPARTMENT
Cardiology Department

CLINICAL FOCUS

A large part of Dr. Aktürk's work concerns coronary artery disease, including ischemic heart disease and chronic total occlusion. Diagnostic evaluation may involve coronary angiography and echocardiography, and where appropriate he performs percutaneous coronary intervention.

Dr. Aktürk also evaluates and treats heart rhythm disorders, including atrial fibrillation, using catheter ablation and pacemaker treatment when these are indicated. In the field of heart valve disease, he assesses patients with aortic stenosis and mitral valve insufficiency, and he sees adults with atrial septal defect.
