İstanbul

DEPARTMENT
Pediatrics

CLINICAL FOCUS

Dr. Çelik's clinical work centers on pediatric assessment and the broad field of child health and diseases. In practice this means evaluating a child's symptoms in the context of their medical history and developmental stage, examining the child in a manner suited to their age, and discussing findings and possible next steps with parents or caregivers.

His areas of expertise span infant care, child care and adolescent care. Each of these age groups presents different health needs and different ways of communicating, and Dr. Çelik places emphasis on age-appropriate assessment and ongoing family communication across all of them.

INTERNATIONAL PATIENTS

Dr. Çelik consults in Turkish and English, and interpreters can be arranged for families who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit.
