CLINICAL FOCUS

Dr. Gençten's practice covers a broad range of urinary, reproductive and male sexual health concerns. He evaluates and treats kidney diseases, urinary incontinence and other aspects of bladder health, and diagnoses and treats diseases of the prostate and urethra. In men's health, he provides sexual dysfunction treatment and assessment for infertility.

His work also includes urologic cancers, in particular bladder cancer and testicular cancer. He performs cystoscopy as part of the diagnostic work-up of bladder and urethral conditions, and he sees children with urological problems within paediatric urology. The choice of diagnostic tests and treatment is made individually after a clinical assessment and a review of the patient's existing findings.

INTERNATIONAL PATIENTS

Dr. Gençten consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges the appointments and the hospital...
