CLINICAL FOCUS

A large part of Dr. Boyacı's practice concerns the nose and sinuses. She evaluates and treats nasal deviation and performs septoplasty, septorhinoplasty, and rhinoplasty, addressing both nasal breathing and nasal shape where appropriate.

Her practice also includes throat and airway conditions, including pharyngitis, adenoid conditions, tonsil surgery, and snoring. She performs prominent ear correction and assesses patients with vertigo and balance disorders, working to identify the likely cause before discussing treatment options.
