DEPARTMENT
Pathology Department

CLINICAL FOCUS

Dr. Hacıoğlu's practice covers diagnostic pathology and medical pathology. In this role, she examines tissue and cell samples obtained during biopsies, surgical procedures and other diagnostic investigations, and prepares reports that describe the findings for the referring physician.

Her work also includes laboratory diagnosis more broadly, carried out within the Pathology Department in coordination with the departments that request the examination. Because pathology results are interpreted alongside the patient's history, clinical examination and imaging, Dr. Hacıoğlu's assessments are delivered as part of a multidisciplinary process rather than in isolation.

INTERNATIONAL PATIENTS

Dr. Hacıoğlu speaks Turkish and English, and interpreters can be arranged for patients who prefer another language. The hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
