DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Kılınç's areas of expertise include the diagnosis and treatment of tooth decay, the placement of dental fillings, and the care of damaged teeth and teeth affected by enamel loss. She also evaluates dental root infections and performs root canal treatment for both primary teeth and permanent teeth. Where a tooth cannot be preserved, tooth extraction is among the procedures she carries out.

A further area of her practice is aesthetic pediatric dentistry, which addresses the appearance of a child's teeth alongside their function and health. As a pedodontics specialist, Dr. Kılınç works with the developmental stages of the child's dentition, and treatment decisions are made after a clinical examination and, where appropriate, a review of imaging.

INTERNATIONAL PATIENTS

Dr. Kılınç speaks Turkish and English, and interpreters can be arranged for families who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, previous treatment records and any relevant laboratory results, and arranges appointments and organizes the hospital visit.
