Acibadem Atakent
Hospital, İstanbul

DEPARTMENT

Radiation Oncology

CLINICAL FOCUS

Dr. Güral plans and delivers cancer radiotherapy for a range of tumor sites. In gastrointestinal oncology, her published work reflects an interest in combined chemotherapy and radiotherapy for rectal cancer and in the role of radiotherapy after surgery for gastric cancer.

Radiotherapy for breast cancer is a further part of her practice, and she offers brachytherapy, a form of radiation treatment in which the radiation source is placed close to or inside the tumor.
