Hospital, İstanbul

DEPARTMENT
Neurosurgery

CLINICAL FOCUS

In cranial neurosurgery, Dr. Akar evaluates and treats patients with brain tumors, brain aneurysms and hydrocephalus. His training in vascular and stereotactic surgery and his publications on endoscopic skull base anatomy reflect a long-standing interest in these areas.

In spinal neurosurgery, his practice includes spinal surgery for lumbar disc herniation and cervical disc herniation, as well as the surgical management of spine and spinal cord tumors. Spine health more broadly forms part of his work in the Spinal Health subspecialty, and treatment recommendations depend on the patient's symptoms,...
