CLINICAL FOCUS

Dr. Özgen's clinical work covers both inflammatory skin disease and procedural dermatology. She treats active acne, pigmentation concerns and psoriasis, with the treatment approach depending on the type and extent of the condition, its course and the patient's general health.

Her procedural expertise includes PRP (platelet-rich plasma) applications, cryotherapy and gold needle applications. Whether a given procedure is suitable is decided after a clinical examination and a discussion of the expected effects, the possible side effects and any alternatives, so that patients understand what a treatment can and...
